EXECUTIVE SUMMARY

According to DeFi Pulse, the total value locked as of September 2021 is nearly $99.16 billion. This massive number shows the serious adoption of decentralization all over the globe. Being backed by robust blockchain technology, it proffers the participants in the ecosystem with brand-new concepts that are secure, transparent, and immutable. Cryptocurrencies are one-of-a-kind digital assets that join this trend. In recent years, it is evident that cryptocurrencies are becoming mainstream, and the use-cases have also been raised to unimaginable levels. Subsequently, this led to the growth of blockchain commerce. And today, according to Coinmarketcap, the total market capitalization of cryptocurrencies is about $2.27 Trillion.

This is a clear signal that the future will be decentralized. Among a plethora of DeFi services available, the contribution of exchanges is colossal. However, when talking about exchanges, both centralized and decentralized exchanges come into play. The non-custodial services offered by the decentralized exchanges gain an edge over the latter. The progression of these exchanges is immense due to their security, transparency, and ability to eradicate middlemen in the process.

The advent of smart contracts has brought a paradigm shift that eliminates the need for third parties in an operation. Thus the audience in the ecosystem has commenced witnessing the mightiness of smart contracts of varying quality that are made of unique configuration processes. This led the dApps to utilize the comprehensive potential of decentralized technology.

Jungle Book Crypto is an open protocol for decentralized exchange on the Binance Smart Chain network. It allows the users to purchase, sell, trade, stake, and exchange crypto assets. Being a peer-to-peer exchange protocol, it eliminates the need for intermediaries in operation and provides a space for users to handle their funds on their own. The orders will be executed on-chain by the best use of smart contracts, and it ensures the highest level of security for the participant's capital.

An Introduction

Jungle Book Crypto is a peer-to-peer, decentralized exchange protocol that works with the objective of providing the custody of funds to each individual user of the platform. Being a protocol created by the community, for the community, it bestows a seamless and frictionless crypto trading experience for the users. It enables participants of the ecosystem to provide liquidity and conceive a market for others to exchange their native tokens. For every swap, the swappers will pay a small fee, while the liquidity providers will earn a reward for their deposits.

Our protocol offers a hassle-free wallet-to-wallet experience, thereby providing users ease of access to a plethora of crypto assets. The non-custodial ownership of the underlying assets and minimal fee to permit users to exchange assets gives the platform an upper hand. Instant trading can be facilitated by connecting the wallet with the platform.

JBC is the indigenous coin of the platform. It is a BEP-20 standard token built on the robust Binance Smart Chain network. The use of this network ensures high-speed transactions at an affordable price. The platform offers an assorted range of decentralized services that are convenient, secure, and reliable. It is committed to eliminating high costs, delays, and volatility associated with the current infrastructure.

MISSION

Jungle Book Crypto has a radical mission to make decentralized finance hold the key that will empower people worldwide. Our mission is,

- To provide a Binance-backed ecosystem for wallet-to-wallet trading and swap for the users in the crypto sphere.
- To establish a thriving decentralized exchange, and provide a seamless trading experience for the crypto admirers.
- To provide you with an all-in application,"JBC HUB", at your fingertips; offering you all the crypto tools that you need to survive the jungle.

VISION

The vision of Jungle Book Crypto is,

- To make our decentralized exchange one of the prominent exchanges In the world.
- To offer a platform that is reliable, conducive, robust, and enriching.
- To deliver the comprehensive utility benefits of decentralized financial services to the end-users.

JUNGLE BOOK CRYPTO ECOSYSTEM

Our Use-Cases:
The various use-cases of JBC are as follows.

- NFT Marketplaces
- Decentralized Exchange
- Multicurrency Wallet
- Base Camp plus many more.

NFT Marketplace

Being a reputable blockchain-based entity, Jungle Book Crypto leverages the concept of NFTs by building its own NFT marketplace. It allows the users to purchase, sell, trade, mint, and hold NFTs securely and confidently. It is an ideal marketplace for NFT admirers to trade unique and rare digital assets. It bestows the ownership rights to the assets and records them in a decentralized ledger.

Market Study

According to the report of DappRadar, the NFT sales have accomplished a milestone of touching $2.5 billion within the first half of 2021, while the previous year just made $13.7 million worth of sales. This colossal value shows the mass adoption of NFTs all across the globe. According to nonfungible.com, the leading NFT project based on the volume of the sales is Cryptopunks, a smart contract-driven digital collectibles. The reports of Coinmarketcap show that the total sales of NFT worldwide are $7.07 billion as of September 3, 2021. When taking the stats of marketplaces, according to Dune analytics, OpenSea has recorded monthly volume sales of $3.3 billion, which is approx. 1 million ETH in the month of August.

These are the latest market trends of NFTs that have taken the world by storm. From the market research reports of askwonder.com, the NFT sector was segregated in the measure of dollar sales of NFTs. It includes metaverses (25%), art (24%), gaming (23%), sport (13%), collectibles (11%), and utility (4%). The NFT marketplaces earn their revenue by charging transaction and other services fees to the users. It is asserted that these fees range from 2.5% - 7.5% of sales. Accordingly, OpenSea and Rarible are the two leading NFT marketplaces in today's NFT sphere. The same report categorizes the top buyers of NFTs into The One-Project Centric, The Major/Minor, or The Diversified. The buyers of the first kind use 100% of their investments in only one project. The buyers of the second kind use 90% of their investment to one project and 10% in other few projects. The buyers of the diversified group are the ones who will be very active in the NFT space. They will invest in diverse projects and do not rely on one project.

Jungle Book Crypto's
NFT Marketplace

Our platform will be built with a robust base of the Binance Smart Chain network. The NFTs can be in the form of artworks, music, photos, videos, in-game assets, digital collectibles, and any other forms that human feels unique. Our marketplace stands as an ideal platform for creators to make them participate actively and provides a seamless NFT trading experience.

Features of our NFT Marketplace

Captivating Storefront: Storefront is a place to showcase the listed NFT to potential buyers. We have a unique storefront that will grab the attention of buyers readily.

Advanced Search: This feature enables the buyers to easily land on their desired kind of NFTs. Our advanced filter and sort option does that with ease.

Effortless Listing: No complications are involved in the process of listing the NFTs. The creators can list their NFTs effortlessly and prefer a fixed-price sale or auction sale.

Wallet: A crypto wallet is crucial for any decentralized application, and we allow them to either create a new one or link their existing wallet to store their traded NFTs.

User Interface: The user interface of the platform is meticulously worked to make it attractive and communicative.

Workflow of Jungle Book Crypto's NFT Marketplace:

1. The profile is mandatory for both the creators and buyers. It can be activated by linking their crypto wallets.

2. For creators, at once the profile is activated, they are eligible to upload the digital version of the work.

3. The title, description, price, and other relevant information are provided for the uploaded content.

4. Now, the creators can mint them to tokenize into NFTs.

5. These NFTs can be listed either in an auction sale or fixed price sale according to their requirements.

6. This is where buyers come into play.

7. If their favorite NFT is on auction sale, then they can place bids. The highest bid in the specified time will win the auction.

8. If their favorite NFT is on a fixed price sale, then they have to pay the required price to claim it.

9. The NFTs will be transferred to their wallets once their transactions are approved.

Perks of our NFT Marketplace:

Immutable Ownership Rights: The NFTs will provide the users an ownership right that cannot be altered or tampered with.

Lucrative Revenues: Our platform provides an ideal space for recognizing creator's masterpieces, and it generates incredible revenue for both the platform and creators.

Instant Liquidity: The users in the platform can swiftly trade their NFTs, which in turn offers immediate liquidity.

Governance Rights: Our JBC platform provides governance attributes to the users. Through these rights, they can provide ideas and proposals for the enrichment of the platform.

Rare assets: Our marketplace will be a treat for NFT admirers as it will be equipped with rare and unique NFT assets. These assets add unique value to their collections.

The Role of JBC Tokens in our NFT Marketplace

JBC, being the native utility token of the platform, aids in leveraging the concept of NFTs across the globe. The users can use these tokens to provide the minting fees, listing fees, trading fees, and other miscellaneous fees to either create an NFT or to purchase an NFT. In this way, the platform generates revenue and uses it for charitable and token burning purposes.

DECENTRALIZED EXCHANGE

As an eminent crypto service provider, we yearn to bring the audience into the crypto sphere through our quality decentralized exchange services. We bestow them a unique opportunity to trade cryptocurrencies with world-class security, enhanced user interface, and sophisticated functionalities. Our non-custodial services will make the user handle their own private keys to manage their funds and access to a plethora of digital assets.

Features of JUNGLEBOOK crypto

Integrated Smart Contracts: The use of smart contracts will automatically execute the process, adds high security, and makes it immutable.

On-Chain Governance: This attribute allows users to vote and decide on the platform's financial decisions. Also, their suggestions for the betterment of the platform will be taken into consideration.

Payment Gateways: The platform is compatible with multiple payment methods and gives a great degree of payment flexibility.

Captivating UI/UX: The interface is designed in such a way so as to seize the attention of users.

Liquidity Management: The users can easily manage their liquidity through our rapid execution of orders.

Digital Wallet: The user can easily link their wallets and store their traded assets securely.

SECURITY Features of JUNGLEBOOK CRYPTO

Encryption of Data:
An encryption algorithm converts readable data of our platform into an unreadable format called ciphertext. In order to decrypt the same data, a secret key must be used. Therefore, the highly confidential decryption key ensures the utmost protection of our user's data and other credentials.

Two-Factor Authentication:
This feature allows users to access their accounts safely. An extra layer of security indeed. With this kind of security, unauthorized logins (outsiders who use credentials of registered users) are prevented. Even after entering the right passwords, this extra security will ask the user to verify the identity by sending random codes to registered emails or mobile phones each time for login.
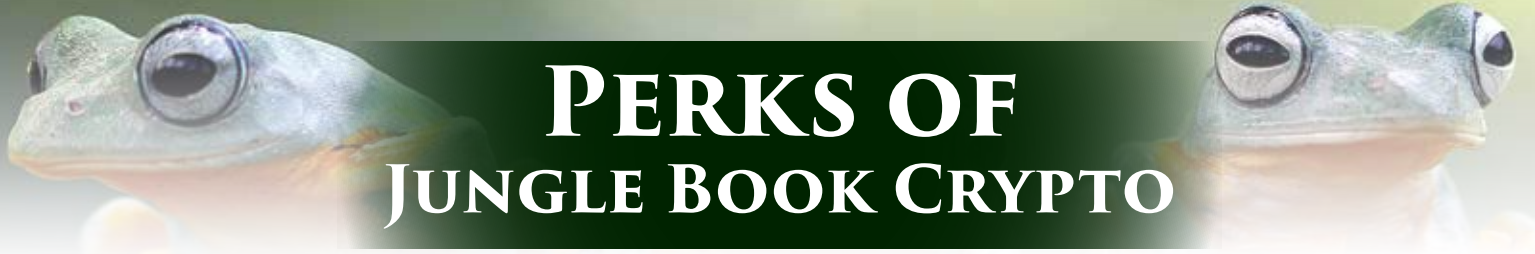

Jail Login:
In order to highly secure the account of our Jungle Book Crypto's users, we provide them with the Jail Login feature. This feature locks the account temporarily upon providing wrong login credentials thrice continuously. The user will be blocked from signing into the platform. However, by contacting our support team, the user can verify and submit proofs to recover their account.

Anti-Distributed Denial of Service (DDoS):
A DDoS attack is a one-of-a-kind attack that is done to make our server, service, or infrastructure completely inaccessible. This attack comes with a higher number of requests from diverse sources on the internet at the same time. The high intensity of this crossfire has the potential to make our services unstable. To overcome this challenge, we have anti-DDoS protection, which works in shielding the platform from huge traffic rising from multiple sources. It analyses the requests in real-time and deviates from the incoming requests. To be precise, it separates the non-legitimate and legitimate requests and processes them accordingly to provide top-notch security to our platform.

Server-Side Request Forgery (SSRF) Protection:
SSRF is a type of attack from a vulnerable application in which our platform or API will be misled into sending a request to another backend service through the internet or across the network of our hosted server, to gather all our data and information. To prevent this attack, we have SSRF protection. It shelters the internal systems from fraudulent attacks that arise from other unsafe applications. Whitelisting domains in DNS, Avoiding sending raw responses to clients, enforcing URL schemas, validating inputs, and enabling authentication on all services are our various precautions taken to safeguard our platform from such malicious attacks.

PERKS OF
JUNGLE BOOK CRYPTO

Highly Scalable: The Binance Smart Chain network facilitates higher throughput for our platform.

High-Speed Transaction at Lower Price: Purchase, sell, trade, withdraw, and swap swiftly at a much affordable price.

Flawless Trading: Our advanced trading features and functionalities will provide a frictionless trading experience to the users.

User-Friendly Platform: The users will have no difficulty in accessing the platform, and they can manage very easily.

Reliable Exchange: Our trusted smart contracts and high-end security makes it a reliable decentralized exchange platform.

Excellent Trading Analysis: All the essential analytics will be denoted in the form of charts and graphs.

JUNGLE BOOK CRYPTO'S REVENUE MODEL

The multifarious revenue sources of the platform include,

Transaction Fee: We levy a minimal fee for every transaction that happens on the platform.

Withdrawal Fee: All the withdrawal operations are accompanied by a tiny withdrawal fee.

Listing Fee: The participants are allowed to list their brand-new crypto coins by paying a small fee.

Miscellaneous Fee: Apart from the above fees, the platform may also incur fees from users rarely for some of the services, including automated algorithmic order and others.

The Native Utility Token

JBC is the indigenous token of the platform. It is a BEP-20 standard token built on the Binance Smart Chain network. One of the prime benefits of using this platform is to aid users with rapid transactions at affordable prices. The exclusive privileges of JBC token holders include,

Staking: One of the most adored use-cases of JBC tokens is staking. The users can stake the tokens to earn impressive rewards. The higher return on investment rates makes them claim exhilarating rewards and profits.

Lending: A peer-to-peer model for lenders and borrowers. It completely eradicates middlemen in the process. As a platform backed by smart contracts, the users can easily trust the process.

Borrowing: The JBC tokens can be used as collateral for borrowing a sum of money to meet financial obligations. The interest rate and the collateralization ratio for the sum borrowed are directly related to supply, demand, and community governance.

Yield Farming: A similar process to staking, in which the users gain handsome returns with their JBC holdings. To be precise, these holdings will be lent out via our DeFi protocol, and this will reap fixed or variable interest periodically.

Burning Mechanism: JBC follows an impressive token burning mechanism in which 3% in each of the transactions will be burnt continuously until we reach a certain milestone. We believe that the burning mechanism will aid our token holders in the long term by gradually increasing the demand. Also, the particulars of tokens burnt will be updated regularly on our platform. The team also has the option of doing manual burns when we achieve certain milestones.

Charity: We will have a choice of 4 charities, the community will choose where the funds will be sent every three months based on voting. The funds will be distributed accordingly by the percentage of the votes.

Governance Rights: The Jungle Book Crypto offers governance attributes to the users. The performance and other activities of the users are monitored continuously, and the ideal users are provided with governance rights. These users can vote directly to decide the financial operations of the platform, including transaction fees. They can also provide suggestions for the betterment of the platform, and the management will implement them if the idea sounds great, thereby making it a community-driven platform.

Multicurrency Wallet

Jungle Book Crypto also works on creating its own multicurrency wallet. A wallet is indispensable for any decentralized application and is crucial for storing the traded assets. Similar to any other crypto wallet, the JBC users can send, receive, and check the balance of their assets whenever required. It is highly secure and has been integrated to carry out BNB/JBC trading pairs.

Our wallet would be available for both android and iOS users, and they can download it from their respective stores. By registering or linking their accounts, they get access to diverse currencies. One of the supreme advantages of the wallet is that they can easily exchange or swap within the application. They can load or unload the wallets via linked digital wallets.

Our multicurrency wallet also facilitates peer-to-peer and instant transfers between the users. It bestows the quick and smooth way for users to transfer crypto assets effortlessly, efficiently, and securely at a minimal transaction cost.

Operations Allowed in our
Multicurrency Wallet

- Send Crypto Assets
- Receive Crypto Assets
- Check Account Balances
- Offer Human-Readable Addresses
- Instant Access to DeFi
- Exchange and Swap of Crypto Assets

JBC - Send, Receive, and Store

JBC Multicurrency Wallet

JBC - Stake

JBC - Swap
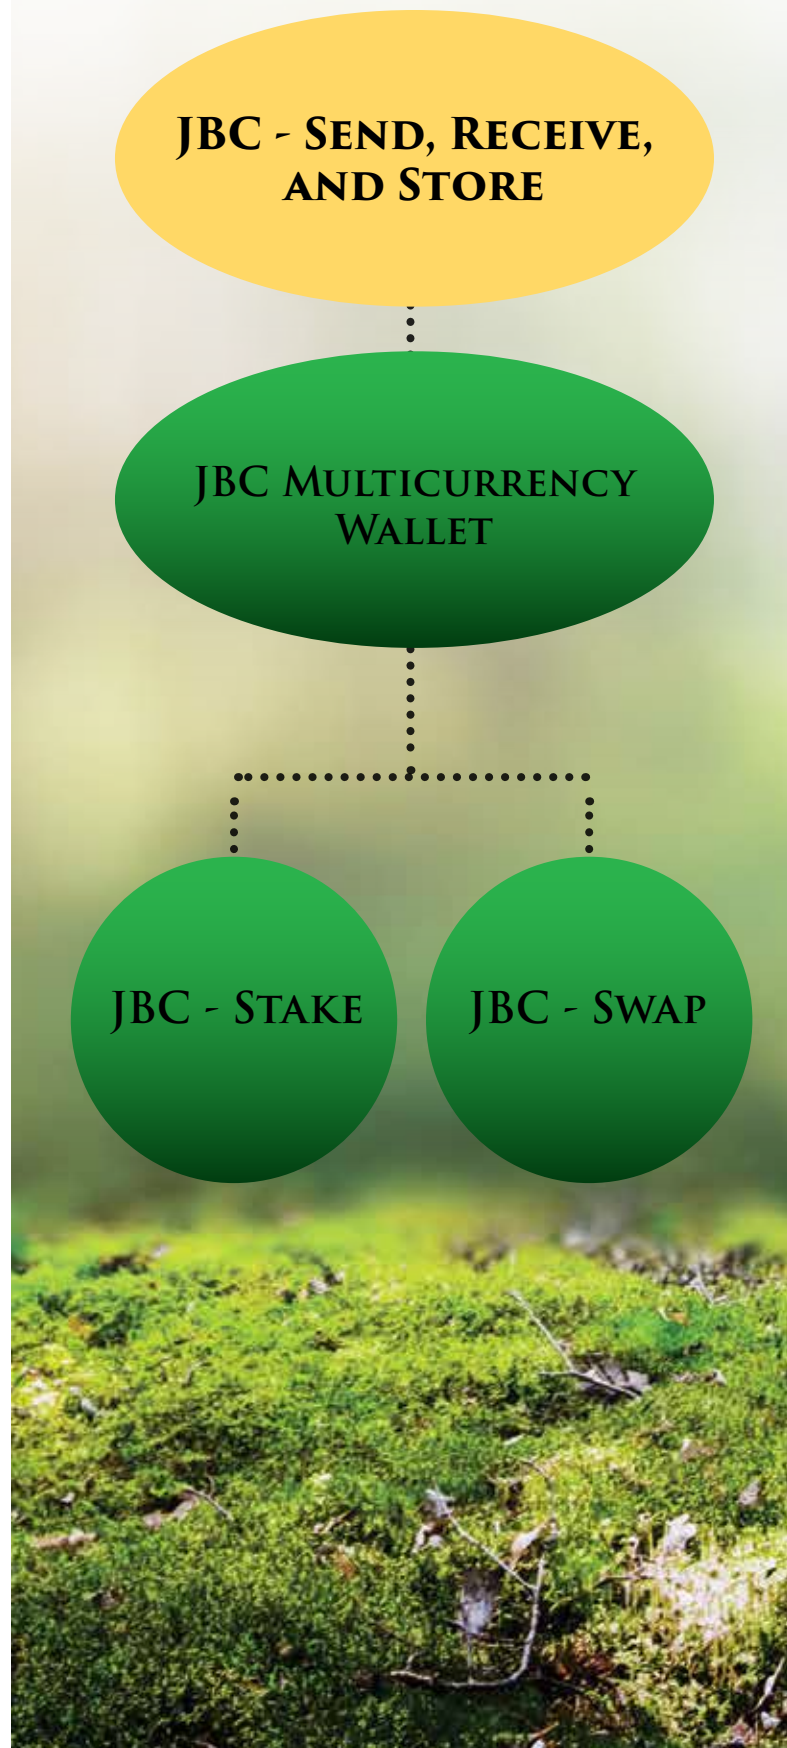

JBC Send, Receive, and Store

This feature of our multicurrency wallet facilitates users to send and receive crypto assets from one wallet to another. They can confirm and verify the real-time balances and settlements to figure out accurate costs of transactions that they make. Both QR and copy-paste features of the wallet addresses are included to bestow users an easy transfer of assets. For each transaction, an ID will be provided through which they can confirm the status of their transaction. Also, we personalize their crypto experience by offering human-readable addresses, in which names can be assigned to the addresses. These addresses are not complicated and allow them to be remembered easily.

JBC SWAP

The swap feature of our multicurrency wallet enables users to instantly swap or exchange their JBC tokens. Initially, JBC tokens can be swapped for the BNB coins at much-reduced transaction fees. Simultaneously, we will be working on expanding the features and functionalities of our wallet to exchange other crypto assets in the near future.

JBC - Stake

This is yet another impressive wallet feature that permits users to stake the JBC tokens to earn remarkable rewards without any hassles. It enables them to earn interest in accordance with blockchain's APY for staking at their convenience.

JBC Tokens Stake

Staking Smart Contract Address

Daily Stake Rewards Paid to Smart Contracts

Unlock Stake by Contacting our Support

Auto Distribution of Rewards Periodically

BASECAMP

Basecamp is a Telegram that we have created especially for crypto admirers. We are in the process of developing basecamp platform within our hub. It is a sphere for these admirers to have discussions on the well-performing crypto projects in the market. We allow the owners of other tokens to come in to advertise their tokens or projects on our website and hub. This one-of-a-kind service is provided with a minimal cost of 1 BNB per week. Also, the users can use JBC tokens worth 1 BNB and avail of the 15% discount instantly. The platform is exclusively designed for advertising promising projects and ensures brand visibility all across the globe which is all integrated in JBC hub. Apart from the regular subscription, we offer a premium package to make the promotions to greater heights. With this package, we charge a fee for placing their project or token banner (enlarged) at the top of all projects. We can manage up to 20 projects and assure the best strategies to promote them worldwide. The fee for this package is 2 BNB or JBC equivalent to 2 BNB for 2 days.

PROGRAM	PRICE
Referral Program	Staking $25 worth of JBC Tokens for a minimum of 30 days with option of re staking
Charts and Tolls	Staking $50 worth of JBC Tokens for A minimum of 30 days with option of re staking
Basecamp Application	Staking $100 worth of JBC Tokens for a minimum of 30 days with option of re staking.

With a magnificent interest to make the potential projects reach great heights, we have included separate programs through which one could get the maximum benefit. It includes

- We provide access to the referral program with a fee of $25 worth of JBC tokens.

- We provide access to the charts and tolls with a fee of $50 worth of JBC tokens.

- We provide access to the entire basecamp application with a fee of $100 worth of JBC tokens.

IDO
LAUNCHPAD

The Biggest Launchpad in the Crypto Jungle

IDO (Initial Dex Offering) platforms provide premier and straightforward crowdfunding opportunities to everyday regular investors and traders. What was once designed and marketed to venture capitalists and big bag holders is now available to the entire market.

The Jungle Book Crypto IDO launchpad benefits the entire cryptocurrency market. A platform enables traders of all sizes to participate in fair launches where projects can receive the funding and support they need. IDO offers better liquidity at every level, allowing immediate access to liquidity and trading. The perfect solution for new projects is to launch a token and access immediate funds. So what makes Jungle Book Crypto's IDO the ideal launchpad?

- As a first step, the team behind Jungle Book Crypto will help the client develop a responsive website with the project details such as launchpad, token, team, etc.

Services will help provide market-proven strategies to improve the success rate of new and exciting projects.

- **Smart Contract Development**

Smart contracts are algorithms that execute in our platform automatically, governing the whole ecosystem. A smart contract can be best defined as a self-executing contract with the terms of the agreement directly written into lines of code. The code controls the execution, and transactions are trackable and irreversible.

- **Token Development**

We will assist the client in developing a BEP-20 based token for the project. Our team will analyze the project and suggest the client with the right tokenomics that include token supply, price.

- **Launchpad**

The launch pad allows early access of the IDO tokens to the investors. The launchpad is responsible for distributing the tokens and raising liquidity. The investors need to pre-buy the launchpad tokens to get on the IDO.

Additional Services

- KYC
- Whitelist
- Staking
- Pools
- FCFS (first come first serve)
- Calendar Events
- Notificaitons
- Help / Support
- Admin Panel (Control for project owners over their token)

The Scope of Jungle Book Crypto

- Our JBC tokens will be listed in PancakeSwap, Coinmarketcap, Coingecko, and other exchanges.

- We will also develop our own hybrid exchange in the near future by adhering to cutting-edge technology.

- Our development is an all-in hub that is at its early stages. The Jbc Hub is a platform that everyone will have easy access to exchange, charts, nft, basecamp, games, among many other things. We'd like to call our JBC Hub the "Facebook of Crypto".

TECHNOLOGY STACK BEHIND JUNGLE BOOK CRYPTO
BLOCKCHAIN TECHNOLOGY

Blockchain technology, often called distributed ledger technology, is one of the crucial technologies available in today's world. The way it transformed the industries is immense, and the concept has proven itself to be a mighty disruptor in recent decades. The following are the benefits that one could glean when implementing blockchain technology in a process.

- Enhanced Security
- Increased Transparency
- Offers Traceability
- Eliminates the intermediaries
- Reduces the price considerably
- Improves speed of the process
- Makes the process highly efficient
- Immutability
- Individual control of data

Therefore blockchain technology is a real game-changer that revolutionized industries to a whole new level, and Jungle Book Crypto is immensely proud to be a blockchain entity that offers novel opportunities to the people in its ecosystem.

Binance Smart Chain Network

Binance Smart Chain is a one-of-a-kind blockchain network that runs parallel to the Binance Chain network. It concentrates on conceiving smart contracts for tokens on Binance-branded blockchain. It has launched its own staking mechanism through which one could become a validator of the network easily. Though Ethereum is one of the popular blockchain networks, they do have certain limitations, including network congestion, slower transaction, and higher transaction fees. BSC solves this single-handedly by providing ultra-fast transactions at an affordable price. The following are the highlights of the Binance Smart Chain network.

Standalone Network:
Even if Binance Chain goes down, Binance Smart Chain does not get affected. BSC is an entirely independent blockchain network.

Ethereum Compatible:
The network is built on the Ethereum Virtual Machine, and dApps built on the Ethereum can be easily ported to the BSC without any complications.

Proof of Staked Authority:
PoSA is the consensus mechanism followed by BSC, which facilitates users to have faster transactions comparatively.

High Performance:
Being a smart contract-enabled platform, BSC processes the transaction with a shorter block time. This tremendously increases the network's performance.

Self-Sovereign Network:
It offers participants in its ecosystem with robust security measures. The data cannot be forged or tampered

Ethereum Compatible:
