By reading this whitepaper, you agree to absolve JUNGLE BOOK CRYPTO from any responsibility for any damages arising directly or indirectly for relying on any information provided in this document. Regarding more queries about legislation and regulations concerning cryptocurrency, we highly recommend that you seek counsel from qualified professionals and your attorney, accountant, or trusted fiduciary.

When drafting this whitepaper, utmost care and diligence were exercised to ensure the integrity of the facts and statements mentioned in the document. However, JUNGLE BOOK CRYPTO does not guarantee the complete accuracy or legal relevancy of the information presented in this whitepaper.

By reviewing and seeking information about JUNGLE BOOK CRYPTO, the reviewer confesses that they have read, understood, agreed, and embraced all the terms and conditions mentioned in the section labeled "DISCLAIMER."

An Introduction

UNGLE BOOK CRYPTO is a peer-to-peer, decentralized exchange protocol that works with the objective of providing the custody of funds to each individual user of the platform. Being a protocol created by the community, for the community, it bestows a seamless and frictionless crypto trading experience for the users. It enables participants of the ecosystem to provide liquidity and conceive a market for others to exchange their native tokens. For every swap, the swappers will pay a small fee, while the liquidity providers will earn a reward for their deposits.

Our protocol offers a hassle-free wallet-to-wallet experience, thereby providing users ease of access to a plethora of crypto assets. The non-custodial ownership of the underlying assets and minimal fee to permit users to exchange assets gives the platform an upper hand. Instant trading can be facilitated by connecting the wallet with the platform. JBC is the indigenous coin of the platform. It is a BEP-20 standard token built on the robust Binance Smart Chain network. The use of this network ensures high-speed transactions at an affordable price. The platform offers an assorted range of decentralized services that are convenient, secure, and reliable. It is committed to eliminating high costs, delays, and volatility associated with the current infrastructure.

JBC users will use the secure platforms to trade, buy and sell not only secure tokens and NFTs, but also physical goods and services such as security cameras, smart home technology and cloud storage. JBC offers a large variety of its own smart tech and services but will also open the digital storefront for other brands to list their own merchandise at a nominal fee. Customers are then able to pick from a range of different payment methods to obtain the goods and services, whilst JBC stakers will be able to enjoy a portion of the fees as staking rewards.

Mission

JUNGLE BOOK CRYPTO HAS A RADICAL MISSION TO MAKE DECENTRALIZED FINANCE HOLD THE KEY THAT WILL EMPOWER PEOPLE WORLDWIDE. OUR MISSION IS,

- To provide a Binance-backed ecosystem for wallet-to-wallet trading and swap for the users in the crypto sphere.
- To establish a thriving decentralized exchange and provide a seamless trading experience for the crypto admirers.
- To provide you with an all-in-one application, "JBC HUB", at your fingertips; offering you all the crypto tools that you need to survive the jungle.
- Providing an All-in-one experience that uses range of tools to help with trading, home security, storage solutions, marketing, selling goods and services, keeping fit and healthy and being a part of an active community.

Vision

THE VISION OF JUNGLE BOOK CRYPTO IS,

- To make our decentralized exchange one of the prominent exchanges in the world.
- To offer a platform that is reliable, conducive, robust, and enriching.
- To deliver the comprehensive utility benefits of decentralized financial services to the end-users.
- Making goods and services available to the world using the power and accessibility of the blockchain

Jungle Book Crypto Ecosystem

Our Use-Cases:
THE VARIOUS USE-CASES OF JBC ARE AS FOLLOWS.

- Digital and Physical Storefront
- NFT Marketplace
- Decentralized Exchange
- Multicurrency Wallet
- Base Camp plus much more...

Marketplace (JBC Store)

JBC prides itself in being able market both digital goods and services along with its own range of physical goods.

The Marketplace is split into two main categories, NFT and Physical goods and Services.

- The NFT section is designed to stand by itself as a central point to purchase, sell, trade, mint, and hold NFTs.
- The physical Marketplace is designed to safely and securely be able to choose from a wide range of goods and service spanning from security cameras, to cloud storage.

Physical goods and services (JBC SMART)

The JBC marketplace prides itself on being able to source, brand and sell its own merchandise. JBC offers its very own smart home solutions known as JBC SMART. JBCs introductory product is the smart security camera and smart home app but that's just the beginning. JBC will also be offering the following in- house tech:

- **Smart lighting –** remotely turn on and off, choose your lighting colour, brightness, tone, and schedule timeframes that fit your style for full lighting automation.

- **Remote garage door openers –** Open the garage door with your voice or the click of a button on your smart device.

- **Motion sensors –** program motion sensors to trigger lighting, devices or security systems to turn on or off

- **Humidity/temperature detectors –** Monitor your homes temperature and humidity whilst you're away or at home to keep that perfect comfortable balance

- **Window/door entry detectors –** Keep your property safe and secure by receiving notifications to your smart device when a window or door is opened

- **Baby Monitors –** Check on and communicate with your bundle of joy to make sure they're safe and secure

- **Smart led strip lighting** – Light up your space to set the mood and tone, customise lighting to give a better feel to your personal space.

- **Smart curtains** – Open/close your curtains with the push of a button, voice command or a timed schedule

- **Wifi universal IR blasters –** Place your IR blaster in a central location to remotely power and control your aircon, hifi system, television etc...

- **Cloud storage –** Monitor, view and store your JBC camera footage securely and safely, from anywhere in the world.

JBC Smart is the ultimate solution for automation, entertainment, and security inside and outside the home or workspace.

List your own products

Browse from a list of carefully selected partner products and services, or even apply to list your own.

JBC will list a range of products and services for you to look through, making sure they're safe and exciting prior to listing.

JBC will charge listers a nominal fee per sale, which will be distributed as follows:

- Proportionally distributed to platinum and gold stakers
- Hub maintenance, upkeep, and upgrades
- JBC buyback

All fees, distributions and taxes will be public and free for all to see, with transparency being the focus of the platform. The distribution of these fees are subject to proportional changes based on volume and market volatility.

Users can make purchases in fiat or are able to connect their JBC wallets in order to make discounted purchases using the native JBC token.

Note: Make sure to have a spare reserve of bep20 BNB to process transactions.

NFT

Jungle Book Crypto's
NFT Marketplace

Being a reputable blockchain-based entity, Jungle Book Crypto leverages the concept of NFTs by building its own NFT marketplace. It allows the users to purchase, sell, trade, mint, and hold NFTs securely and confidently. It is an ideal marketplace for NFT admirers to trade unique and rare digital assets. It bestows the ownership rights to the assets and records them in a decentralized ledger.

Features of our NFT Marketplace

Our platform will be built with a robust base of the Binance Smart Chain network. The NFTs can be in the form of artworks, music, photos, videos, in-game assets, digital collectibles, and any other forms that people can imagine. Our marketplace stands as an ideal platform for creators to make them participate actively and provides a seamless NFT trading experience.

Captivating Storefront: The NFT storefront is a place to showcase the listed NFT to potential buyers. We have a unique storefront that will grab the attention of buyers readily.

Advanced Search: This feature enables the buyers to easily land on their desired kind of NFTs. Our advanced filter and sort option does that with ease.

Effortless Listing: No complications are involved in the process of listing the NFTs. The creators can list their NFTs effortlessly and prefer a fixed-price sale or auction sale.

Wallet: A crypto wallet is crucial for any de-centralized application, and we allow them to either create a new one or link their existing wallet to store their traded NFTs.

User Interface: The user interface of the platform is meticulously worked to make it attractive and communicative.

Workflow of Jungle Book Crypto's NFT Marketplace:

1. The profile is mandatory for both the creators and buyers. It can be activated by linking their crypto wallets.

2. For creators, at once the profile is activated, they are eligible to upload the digital version of the work.

3. The title, description, price, and other relevant information are provided for the uploaded content.

4. Now, the creators can mint them to tokenize into NFTs.

5. These NFTs can be listed either in an auction sale or fixed price sale according to their requirements.

6. This is where buyers come into play.

7. If their favourite NFT is on auction sale, then they can place bids. The highest bid in the specified time will win the auction.

8. If their favourite NFT is on a fixed price sale, then they have to pay the required price to claim it.

9. The NFTs will be transferred to their wallets once their transactions are approved.

Perks of our NFT Marketplace:

Immutable Ownership Rights: The NFTs will provide the users an ownership right that cannot be altered or tampered with.

Lucrative Revenues: Our platform provides an ideal space for recognizing creator's masterpieces, and it generates incredible revenue for both the platform and creators.

Instant Liquidity: The users in the platform can swiftly trade their NFTs P2P, which in turn offers immediate liquidity.

Governance Rights: Our JBC platform provides governance attributes to the users. Through these rights, they can provide ideas and proposals for the enrichment of the platform.

Rare assets: Our marketplace will be a treat for NFT admirers as it will be equipped with rare and unique NFT assets. These assets add unique value to their collections.

The Role of JBC Tokens in our NFT Marketplace

JBC, being the native utility token of the platform, aids in leveraging the concept of NFTs across the globe. The users can use these tokens to provide the minting fees, listing fees, trading fees, and other miscellaneous fees to either create an NFT or to purchase an NFT. In this way, the platform generates revenue and uses it for charitable and token burning purposes.

DECENTRALIZED EXCHANGE
JBC HYBRID

is an All-in-one hybrid swap with over 70 tokens, spanning three main chains (BSC, ETH, MATIC). The user will have full control over their funds, but will still receive support with any technical issues that may arise. As an eminent crypto service provider, we yearn to bring the audience into the crypto sphere through our quality decentralized exchange services.

We provide users with a unique opportunity to trade cryptocurrencies with world-class security, enhanced user interface, and sophisticated functionalities. Our non-custodial services will make the user handle their own private keys to manage their funds and access to a plethora of digital assets.

Integrated Smart Contracts: The use of smart contracts will automatically execute the process, adds high security, and makes it immutable.
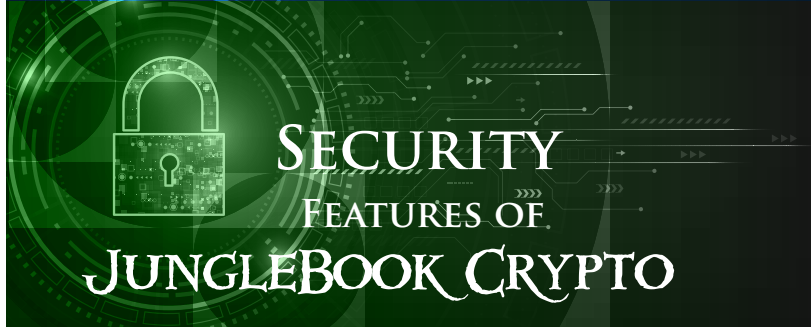

On-Chain Governance: This attribute allows users to vote and decide on the platform's financial decisions. Also, their suggestions for the betterment of the platform will be taken into consideration.

Payment Gateways: The platform is compatible with multiple payment methods and gives a great degree of payment flexibility.

Captivating UI/UX: The interface is designed in such a way so as to seize the attention of users.

Liquidity Management: The users can easily manage their liquidity through our rapid execution of orders.

Digital Wallet: The user can easily link their wallets and store their traded assets securely.

Encryption of Data:
An encryption algorithm converts readable data of our platform into an unreadable format called ciphertext. To decrypt the same data, a secret key must be used. Therefore, the highly confidential decryption key ensures the utmost protection of our user's data and other credentials.

Two-Factor Authentication:
This feature allows users to access their accounts safely. An extra layer of security indeed. With this kind of security, unauthorized logins (outsiders who use credentials of registered users) are prevented. Even after entering the right passwords, this extra security will ask the user to verify the identity by sending random codes to registered emails or mobile phones each time for login.

Jail Login:
In order to ensure the security of the account of our Jungle Book Crypto's users, we provide them with the Jail Login feature. This feature locks the account temporarily upon providing wrong login credentials thrice continuously. The user will be blocked from signing into the platform. However, by contacting our support team, the user can verify and submit proofs to recover their account.

Anti-Distributed Denial of Service (DDoS):
A DDoS attack is a one-of-a-kind attack that is done to make our server, service, or infrastructure completely inaccessible. This attack comes with a higher number of requests from diverse sources on the internet at the same time. The high intensity of this crossfire has the potential to make our services unstable. To overcome this challenge, we have anti-DDoS protection, which works in shielding the platform from huge traffic rising from multiple sources. It analyses the requests in real-time and deviates from the incoming requests. To be precise, it separates the non-legitimate and legitimate requests and processes them accordingly to provide top-notch security to our platform.

Server-Side Request Forgery (SSRF) Protection:
SSRF is a type of attack from a vulnerable application in which our platform or API will be misled into sending a request to another backend service through the internet or across the network of our hosted server, to gather all our data and information. To prevent this attack, we have SSRF protection. It shelters the internal systems from fraudulent attacks that arise from other unsafe applications. Whitelisting domains in DNS, Avoiding sending raw responses to clients, enforcing URL schemas, validating inputs, and enabling authentication on all services are our various precautions taken to safeguard our platform from such malicious attacks.

Perks of
Jungle Book Crypto

Highly Scalable: The Binance Smart Chain network facilitates higher throughput for our platform.

High-Speed Transaction at Lower Price: Purchase, sell, trade, withdraw, and swap swiftly at a much affordable price.

Flawless Trading: Our advanced trading features and functionalities will provide a frictionless trading experience to the users.

User-Friendly Platform: The users will have no difficulty in accessing the platform, and they can manage very easily.

Reliable Exchange: Our trusted smart contracts and high-end security makes it a reliable decentralized exchange platform.

Excellent Trading Analysis: All the essential analytics will be denoted in the form of charts and graphs.

Jungle Book Crypto's Revenue Model

The multifarious revenue sources of the platform include,

Transaction Fee: We levy a minimal fee for every transaction that happens on the platform.

Withdrawal Fee: All the withdrawal operations are accompanied by a tiny withdrawal fee.

Listing Fee: The participants are allowed to list their brand-new crypto coins by paying a small fee.

Miscellaneous Fee: Apart from the above fees, the platform may also incur fees from users rarely for some of the services, including automated algorithmic order and others.

Transactions Fees and rewards

Each swap under $50 will incur a fee of $2, with fees capping at $4 for transactions over $50, along with additional gas fees.

The fees taken from each transaction will be distributed as follows:

• 40 percent proportionally distributed to platinum and gold stakers
• 40 percent Hub maintenance, upgrades and upkeep
• 20 percent JBC buyback

Note: Please remember to have a spare reserve of Bep20 BNB to process transactions.

All fees, distributions and taxes will the public and free for all to see, with transparency being the focus of the platform.

THE NATIVE UTILITY TOKEN

JBC is the indigenous token of the platform. It is a BEP-20 standard token built on the Binance Smart Chain network. One of the prime benefits of using this platform is to aid users with rapid transactions at affordable prices. The exclusive privileges of JBC token holders include,

Staking: One of the most adored use-cases of JBC tokens is staking. The users can stake the tokens to earn impressive rewards. The higher return on investment rates makes them claim exhilarating rewards and profits.

Lending: A peer-to-peer model for lenders and borrowers. It completely eradicates middlemen in the process. As a platform backed by smart contracts, the users can easily trust the process.

Borrowing: The JBC tokens can be used as collateral for borrowing a sum of money to meet financial obligations. The interest rate and the collateralization ratio for the sum borrowed are directly related to supply, demand, and community governance.

Yield Farming: A similar process to staking, in which the users gain handsome returns with their JBC holdings. To be precise, these holdings will be lent out via our DeFi protocol, and this will reap fixed or variable interest periodically.

Burning Mechanism: JBC follows an impressive token burning mechanism in which 3% in each of the transactions will be burnt continuously until we reach a certain milestone. We believe that the burning mechanism will aid our token holders in the long term by gradually increasing the demand. Also, the particulars of tokens burnt will be updated regularly on our platform. The team also has the option of doing manual burns when we achieve certain milestones.

Charity: We will have a choice of 4 charities, the community will choose where the funds will be sent every three months based on voting. The funds will be distributed accordingly by the percentage of the votes.

Governance Rights: The Jungle Book Crypto offers governance attributes to the users. The performance and other activities of the users are monitored continuously, and the ideal users are provided with governance rights. These users can vote directly to decide the financial operations of the platform, including transaction fees. They can also provide suggestions for the betterment of the platform, and the management will implement them if the idea sounds great, thereby making it a community-driven platform.

Multicurrency Wallet

JUNGLE BOOK CRYPTO has additionally created its own multicurrency wallet. A wallet is indispensable for any decentralized application and is crucial for storing the traded assets. Similar to any other crypto wallet, the JBC users can send, receive, and check the balance of their assets whenever required. It is highly secure and has been integrated to carry out BNB/JBC trading pairs.

Our wallet is available for both android and iOS users, and they can download it from their respective stores. By registering or linking their accounts, they get access to diverse currencies (over 70 upon release). One of the supreme advantages of the wallet is that they can easily exchange or swap within the application. They can load or unload the wallets via linked digital wallets.

Our multicurrency wallet also facilitates peer-to-peer and instant transfers between the users. It provides the user with a quick and smooth method of transferring crypto assets effortlessly, efficiently, and securely at a minimal fixed transaction cost.

Operations Allowed in our
Multicurrency Wallet

- Send Crypto Assets
- Receive Crypto Assets
- Check Account Balances
- Offer Human-Readable Addresses
- Instant Access to DeFi
- Exchange and Swap of Crypto Assets

JBC
SEND, RECEIVE, AND STORE

This feature of our multicurrency wallet facilitates users to send and receive crypto assets from one Swap wallet to another. They can confirm and verify the real-time balances and settlements to figure out accurate costs of transactions that they make. Both QR and copy-paste features of the wallet addresses are included to bestow users an easy transfer of assets. For each transaction, an ID will be provided through which they can confirm the status of their transaction. Also, we personalize their crypto experience by offering human-readable addresses, in which names can be assigned to the addresses. These addresses are not complicated and allow them to be remembered easily.

JBC
SWAP

The swap feature of our multicurrency wallet enables users to instantly swap or exchange their JBC tokens. Initially, JBC tokens can be swapped for the BNB coins at much-reduced transaction fees.

Simultaneously, the dex functions of PancakeSwap, UniSwap and Sushiswap are all build into the wallet, which will continue to grow over time.

JBC - STAKE

This is yet another impressive wallet feature that permits users to stake the JBC tokens to earn remarkable rewards without any hassles. It enables them to earn interest in accordance with blockchain's APY for staking at their convenience. This has been in effect with the native token prior to launch, with great success.

JBC FIT

Strategic partnerships will allow the marketplace to stock specialised fitness merchandise along with an app to help track and reward users for getting fit.

JBC Fit is yet another innovative project designed to help assimilate into the entire JBC ecosystem.

BASECAMP

Basecamp is a special chat made just for investors, partners, and representatives. It's been specially designed to help bridge the gap from creator, investors, and platform itself.

Members will be able to ask questions, join a community, be the first to receive major announcements and receive personalized assistance for troubleshooting and listing.

Users will enjoy the flexibility of being able to use the App version of basecamp and the telegram version powered by Sloths All-Stars.

IDO Launchpad
The Biggest Launchpad in the Crypto Jungle

IDO (Initial Dex Offering) platforms provide premier and straightforward crowdfunding opportunities to everyday regular investors and traders. What was once designed and marketed to venture capitalists and big bag holders is now available to the entire market.

The Jungle Book Crypto IDO launchpad benefits the entire cryptocurrency market. A platform enables traders of all sizes to participate in fair launches where projects can receive the funding and support they need. IDO offers better liquidity at every level, allowing immediate access to liquidity and trading.

The perfect solution for new projects is to launch a token and access immediate funds. So what makes Jungle Book Crypto's IDO the ideal launchpad?
• As a first step, the team behind Jungle Book Crypto will help the client develop a responsive website with the project details such as launchpad, token, team, etc. Services will help provide market-proven strategies to improve the success rate of new and exciting projects.

• **Smart Contract Development:** Smart contracts are algorithms that execute in our platform automatically, governing the whole ecosystem. A smart contract can be best defined as a self-executing contract with the terms of the agreement directly written into lines of code. The code controls the execution, and transactions are trackable and irreversible.

• **Token Development** We will assist the client in developing a BEP-20 based token for the project. Our team will analyse the project and suggest the client with the right tokenomics that include token supply, price.

• **Launchpad:** The launch pad allows early access of the IDO tokens to the investors. The launchpad is responsible for distributing the tokens and raising liquidity. The investors need to pre-buy the launchpad tokens to get on the IDO.

• KYC
• Whitelist
• Staking
• Pools
• FCFS (first come first serve)
• Calendar Events
• Notifications
• Help / Support
• Admin Panel (Control for project owners over their token)

The Scope of Jungle Book Crypto

• Our JBC tokens will be listed in PancakeSwap, Coinmarketcap, Coingecko, and other central and de-fi exchanges.

• We will also develop our own hybrid exchange to bridge and support JBC multichain in the near future by adhering to cutting edge technology.

• Our development is an all-in hub that is set to be releas. The JBC Hub is a platform that everyone will have easy access to exchange, charts, NFT, basecamp, games, among many other things. We'd like to call our JBC Hub the "Facebook of Crypto".

• JBC fit expansion, from fitness wear, trackers and many more aspects to keep users healthy.

JBC

TECHNOLOGY STACK BEHIND JUNGLE BOOK CRYPTO

Blockchain Technology

Blockchain technology, often called distributed ledger technology, is one of the crucial technologies available in today's world. The way it transformed the industries is immense, and the concept has proven itself to be a mighty disruptor in recent decades. The following are the benefits that one could glean when implementing blockchain technology in a process.

- Enhanced Security
- Increased Transparency
- Offers Traceability
- Eliminates the intermediaries
- Reduces the price considerably
- Improves speed of the process
- Makes the process highly efficient
- Immutability
- Individual control of data

Therefore, blockchain technology is a real game-changer that revolutionized industries to a whole new level, and Jungle Book Crypto is immensely proud to be a blockchain entity that offers novel opportunities to the people in its ecosystem.

Binance Smart Chain Network

Binance Smart Chain is a one-of-a-kind blockchain network that runs parallel to the Binance Chain network. It concentrates on conceiving smart contracts for tokens on Binance-branded blockchain. It has launched its own staking mechanism through which one could become a validator of the network easily.

Though Ethereum is one of the popular blockchain networks, they do have certain limitations, including network congestion, slower transaction, and higher transaction fees. BSC solves this single-handedly by providing ultra-fast transactions at an affordable price. The following are the highlights of the Binance Smart Chain network.

Standalone Network:
Even if Binance Chain goes down, Binance Smart Chain does not get affected. BSC is an entirely independent blockchain network.

Ethereum Compatible:
The network is built on the Ethereum Virtual Machine, and dApps built on the Ethereum can be easily ported to the BSC without any complications.

Proof of Staked Authority:
PoSA is the consensus mechanism followed by BSC, which facilitates users to have faster transactions comparatively.

High Performance:
Being a smart contract-enabled platform, BSC processes the transaction with a shorter block time. This tremendously increases the network's performance.

Self-Sovereign Network:
It offers participants in its ecosystem with robust security measures. The data cannot be forged or tampered

Ethereum Compatible:

Tokenomics

Token Details

Token Name	JUNGLE BOOK CRYPTO
Alternative Name	JBC TOKEN
Abbreviation if any	JBC
Token Standard	BEP20
Total number of coins	1 QUADRILLION (1000 TRILLION)

Airdrop

Airdrop to Founding Team	4% (40 T)
Development & Marketing Future	6% OF INITIAL JBC (60 T) IS LOCKED FOR 6 MONTHS
Referral Program	5% OF INITIAL SUPPLY (50T)
Legal	3.3% OF INITIAL SUPPLY (33T) IS LOCKED

Private Sale

Token allocated for Private Sale	(3.3%)
Presale / ICO Target	500 BNB (FUNDS USED FOR DEVELOPMENT, OPERATION COSTS)
Token Price for Presale	0.0000000087
Max cap per investor	MIN 0.1BNB MAX BUY 5BNB
Admin Burn	270T TOKENS ALREADY BURNED, 3T MORE TO BURN AT LAUNCH

Presale BNB utilization

Target	950BNB (30 000 000 000 000)
Product Development	30% 285
Liquidity	IF TARGET REACHED 665BNB

TAX Utilization

JBC TOKENOMICS	3% BURN
AUTOMATIC BURNING	3% OF TRANSACTION AUTOMATICALLY BURN
	1% CHARITY FROM TRANSACTIONS
	3% PANCAKE SWAP (1.5%BNB/1.5%JBC)
	LIQUIDITY PERCENTAGE, CHARITY, WILL BE CUT IN HALF AT 50% WHEN WE ACHIEVE A CERTAIN TOKEN CIRCULATION.

TAX Utilization

Automatic Burning %	3% of transaction automatically burned
Automatic Burning Target	When circulation reaches a certain amount burning will stop

Number of Wallets

Team Wallets	Locked for 4 months with only max sell of 5% after unlocked and then locked agian, community will be notified if any wallets are used.
Burn Wallet	0x0000000000000000000000000000000 000000001
Development, Marketing, Operations Future	Locked for 6 months once launched
Charity Wallet	Locked for 3 months
Referral wallet	This wallet if for the community referrals. Automatic referral program implemented.
Licensing and Legal	Locked for 3 months and then relocked again. Community will be notified.
Anti-Whale mechanism	No more than 250 billion tokens can be used in a single transaction.

At 50 trillion tokens in circulating supply 3% tax burn will stop but also manual burn will be available

After 1 year when we lock 40% of the liquidity to Pancakeswap 3% fee will stop and the liquidity will be moved to the JBC HUB liquidity.

At 500 billion tokens in circulating supply 1% Charity will be cut in half so .5% fee will be charged and at 100 billion .5% will stop

At 100 billion tokens in circulating supply, JBC Hub transaction fees liquidity 2% will drop to 1% .5BNB .5JBC

BNB Wallet for presale that collects is 0x0D3106407a96dE95A90E2C7615199419973f1cc6

Token Distribution

- Exchange Listing
- Initial Coin Offering
- Founders
- Development and Marketing
- Advisors
  Anti-Whale Mechanism

Fund Utilization

- Platform & Core Product Development
- Marketing & Business Development
- Operations
- Exchange Listing
- Market Research

Road Map

Phase 1

✓ **Token Development**
October 2021
See audit here:
https://www.junglebookcrypto.com/about/#audits

✓ **Creating social media sites**
June 2021
See linktree here: https://www.junglebookcrypto.com

✓ **Website Development/Launch**
September 2021
See website here: https://linktr.ee/Junglebookcrypto

✓ **Company Registration**
August 2021
Queensland registered Australian business

✓ **Private sale complete**
November 2021 to January 2022
Including over 500BNB raised

✓ **Marketing**
Including youtubers, call channels, pinned posts, social banners,
public AMAs.

✓ **JBC v1 Hub launch**
November 2021
Fully operational, sending, receiving, secure login link here
for details: https://play.google.com/store/apps/details?id=com.
jungle.wallet

Phase 2

✓ **Staking on JBC v1**
February 2022
Refer to app:
https://www.junglebookcrypto.com/about/#audits

✓ **Partnerships (Payright, Tuya)**
July 2022
Refer to:
https://www.junglebookcrypto.com/about

🕐 **JBC v2 Hybrid Exchange (Dex)**
Under testing
An all-in-one swapping tool spanning three main chains (BSC,
ETH, MATIC), that uses fixed prices to easily swap over 70
tokens.
Including youtubers, call channels, pinned posts, social banners,
public AMAs.

🕐 **Marketing**
Including promos, partnerships, NFT launching, AMAs,
competitions, banners and online advertising.

🕐 **Listing partnerships for token launch**
Coinsbit signed in February 2022
Pending token launch, more information to come.

🕐 **Coinmarketcap and Coingecko listing
on launch**
Using special connections to list fast and efficiently.

Phase 3

🕐 **JBC v2 Hybrid launch**
December 2022
Sneak peak here:
https://www.junglebookcrypto.com/jbc-hub-v2-preview

🕐 **JBC Smart app launch with JBC token
integration**
January 2023
Development almost complete - preview TBA

🕐 **More listing partnerships**
Starting 2023 and throughout the year
Listing partnered tokens, merchandise and NFTs with known safe
analysed projects in the space.

🕐 **JBC Store**
To be launched in February 2023
Demonstration to be teased soon - debuting the JBC Smart range

🕐 **Marketing**
Using effective and professional teams specialising in multi-token
launch and high profile project development

Phase 4

🕐 **JBC Fit**
Launch in May 2023
Progress TBA

🕐 **JBC Fit wear range**
End of 2023
JBC's own range of stylish apparel and smart gear

🕐 **Large production partnerships**
Throughout 2023 - 2024
Including big names in fashion, manufacturing, design and
conservation

🕐 **NFT marketsplace development**
April 2023
Showcasing JBC's own range of NFTs along with partners that have
already signed up for listing

🕐 **JBC launchpad**
Assisting in launching safe, reputable projects with known teams and
brands.

... more to come.
